Re: Site Name: Michigan Standard Alloys
TDD No.: F05-8710-121

Dear Mr. Marshall:

This letter is in response to your recent inquiry requesting additional information concerning our firm. Ecology and Environment, Inc. has been retained by the U.S. Environmental Protection Agency under contract 68-01-7347 for the purpose of evaluating candidate sites for the National Priorities List under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA), better known as Superfund.

Information supplied to the U.S. EPA through the Michigan Department of Natural Resources has identified the property in question as a possible candidate for the National Priority List. Information concerning your monitoring wells are needed as part of our evaluation. Who installed the wells? How were they installed and are they still functional? Other information needed are well records, boring records, well depths, diameter of wells and elevations.

I have attached a copy of the Letter of Introduction provided by the U.S. EPA for Ecology and Environment employees engaged in field investigation work, which outlines the statutory basis for such information. Also, attached is a copy of the confidentiality memorandum that all Ecology and Environment employees have signed.

If you have any further information, please do not hesitate to call me.

Sincerely,

Randy Livingston
